

SITUATION REPORT (SITREP)

Title: Unauthorized Access on Server-Y

Date/Time Detected: 2025-08-18 13:00

Reported By: SOC Analyst – Tier 1

Summary:

An unauthorized access event was detected on Server-Y from IP address 192.168.1.200.

The activity matched MITRE ATT&CK technique T1078 (Valid Accounts).

The login occurred outside normal business hours and was identified as suspicious during initial review.

Actions Taken:

- Server isolated from network
- Initial logs collected
- User activity reviewed
- Incident escalated to Tier 2

Impact:

Potential compromise of server access. No lateral movement confirmed.

Next Steps:

- Credential analysis
- Root cause investigation
- Further forensic review

Status:

Escalated to Tier 2 – Under Investigation
